CNC training with industrial performance

/TRAINING IS WHAT MAKES THE FUTURE POSSIBLE

For many, the gateway to the world of machining is an EMCO. But the demands on training concepts are becoming ever more varied and are changing with digitalisation. That is why we also provide our customers with individual solutions in this area, which start as early as the planning phase and are designed precisely for the corresponding needs and possibilities. Our goal is to set new standards in consulting, training and education.

Thanks to its modular structure, the concept of EMCO Industrial Training is suitable for customer-specific consulting and optimally adapted CNC training.

Customised planning for training

The determination of the specific customer requirements for machines, CNC software and courseware are an important part of every order. With optimal training of the individual instructors at the machines, in the programming and in the didactic documents, EMCO Industrial Training supports customers in every phase of the project. In addition, there is guaranteed comprehensive support during the training process.

Extensive hardware and software package

EMCO Industrial Training can be optimally adapted to the various needs of individual companies and partners and, in addition to concept machines and software, also includes optimally coordinated instructional documents - the courseware. Special CAD/CAM programs and 3D CNC simulators make it really easy to learn fundamentals and procedures.

PERFECT ENTRY INTO THE INDUSTRY-RELATED TRAINING

The Concept TURN 60 is a PC-controlled 2-axis CNC tabletop turning machine conforming to the industry standard in terms of design and function. It offers the user more power and functionality, in accordance with the demands of ISO 23125. All the key processes in modern manufacturing can be illustrated using this device and comprehended in a practical and realistic way. With appropriate simplification, clear machine design and easy operation. Operators will quickly learn how to use it successfully.

Round-head bolt (Aluminium)

MAIN SPINDLE

/ Max. speed 4200 rpm / Clockwise/counterclockwise spindle rotation / Spindle bore Ø 16 mm

WORK AREA

/ Fully enclosed work area
 / Large safety glass window in door
 / All-round protection against chips

MACHINE BASE

/ With extensible drawer/ Additional space for PC tower

TOOL TURRET

/ Disc turret / 8 stations

MAIN DRIVE

/ Infinitely adjustable main drive
 / 3-phase AC asynchronous motor
 / High-resolution axis motors

6 SAFETY

/ In accordance with ISO 23125
 / Door lock
 / Standstill and speed limit monitoring

SWIVEL TABLE

/ Extensible drawer for PC keyboard/ Arranged ergonomically

EMCO EASY2CONTROL

 / On-screen control keyboard in conjunction with Easy2operate
 / Operation is also possible using a 16:9 full-HD touchscreen

MACHINE DESIGN

/ Industry-standard inclined-bed design/ Core components made from stable cast iron

OPERATION

/ Enabling key / Emergency stop pushbuttons / Mode selection

SMALL MACHINE. GREAT PERFORMANCE.

This compact milling machine is well suited for CNC training and has almost all the features of an industrial machine: optional with 8-station tool changer with swivel arm and pick-up system, NC indexing device as fourth axis, minimum quantity lubrication and latest state-of-the-art control technology.

Piston rod (Aluminium)

MAIN DRIVE

/ Infinitely variable main drive / 3 phase asynchronous motor

WORK AREA

/ Full cover of work area / Large safety glass window in door / All-round protection against chips

MACHINE BASE

/ With removable drawer / Space for PC tower

TOOL CHANGER

/ 8 stations / Swivel arm with pick-up system

Machine with optional equipment

SWIVEL TABLE

/ Extensible drawer for PC keyboard / Arranged ergonomically

MACHINE DESIGN 6

/ Stable, gray cast-iron construction

EMCO EASY2CONTROL

/ On-screen control keyboard in conjunction with Easy2operate
 / Operation is also possible using a 16:9 full-HD touchscreen

SOLID AND PRECISE IN PERFORMANCE. COMPACT IN DESIGN.

PC-controlled 2-axis turning machine with table format. All precision components of the Concept TURN 105 such as headstock, slide, tool system and tailstock are installed on a rigid, vibrationdamping, gray cast-iron inclined bed. Generously sized motors ensure high feed forces and acceleration values. Pre-stressed, backlash-free circulating-ball spindles and an optimum guide ratio for the slides ensure stability and precision.

Hose nozzle (Brass)

WORK AREA

/ Fully enclosed work area / Large safety glass window in door / Generous view of working area / All-round protection against chips / Best ergonomics

MAIN DRIVE

/ Infinitely variable main drive / 3 phase asynchronous motor

MACHINE BASE / With extensible drawer

/ Provides space for PC tower

TOOL TURRET

/ Disk-type turret / 8 stations

Machine with optional equipment

SWIVEL TABLE

/ Extensible drawer for PC keyboard / Arranged ergonomically

TAILSTOCK

/ Pneumatic tailstock / Quill diameter 35 mm

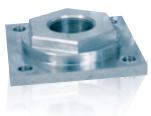

/ On-screen control keyboard in conjunction with Easy2operate / Operation is also possible using a 16:9 full-HD touchscreen

/ SMALL VOLUME. GREAT PERFORMANCE.

To ensure maximum precision the slides and load-bearing elements of the Concept MILL 105 are manufactured from gray cast iron. Equipped with infinitely variable main drive, 10-station tool changer, pneumatic vise and NC indexing device as optional fourth axis, this compact machine in table format is optimally suitable for teaching of sophisticated function and manufacturing technologies. The control for the Concept MILL 105 is connected via PC, on which the interchangeable WinNC control from EMCO can be installed.

Milled part (Machining steel)

TOOL MAGAZINE

/ Tool magazine with directional logic / For 10 tools

WORK AREA

/ Generous view of work area / Best ergonomics

MACHINE BASE

/ With extensible drawer / Provides space for PC tower

Machine with optional equipment

emco

/ All-round protection against chips / 100% coolant retention

/ Optimum view of working area

/ Large safety glass window in door

SWIVEL TABLE

/ Extensible drawer for PC keyboard / Arranged ergonomically

EMCO EASY2CONTROL

/ On-screen control keyboard in conjunction with Easy2operate / Operation is also possible using a 16:9 full-HD touchscreen

/ TECHNICALLY CHALLENGING TRAINING PARTNER FOR EDUCATION AND INDUSTRY-RELATED MANUFACTURING.

The Concept TURN 260 convinces by its extreme solid machine bed, a thermosymmetric spindle head, precision spindle bearing, preloaded roller guides in all axes and a fast tool turret. The interchangeable control EMCO WinNC for all current industrial controls completes the machine.

Fitting (Stainless steel)

WORK AREA

/ Free chip drop / Excellent ergonomics / All-round protection against chips / Large safety glass window in door

MAIN SPINDLE

/ High drive performance / Thermoresistant construction / Large speed range / Bar capacity Ø 25 mm / Hollow clamping device

TOOL TURRET

/ 12 stations VDI16 axial / 6 stations driven on request for milling work / Synchronized thread cutting

ROLLER GUIDES

/ In X and Z axes / No backlash / No wear / High speed

CONTROL

/ Latest digital AC control technology / 21.5" touchscreen / MOC: integrated PC / WinNC concept: all standard NC controls on one machine / Multifunctional handwheel

MACHINE BASE

/ Small installation area / Large coolant tank / Easy to clean

NOT JUST TRAINING. **REAL ACTION!**

The Concept MILL 260 convinces with a drive performance of 6.8 kW and a 20-position tool magazine with a quick double gripper. Thanks to its stable and compact design, the Concept Mill 260 fits into the smallest space. The exchangeable EMCO WinNC control allows for maximum flexibility when it comes to training in the use of all common machine controls.

Cutter head (Non-ferrous metal)

/ 20-station tool magazine / Quick release with double-gripper / Tool system SK 30 DIN 69871

MAIN DRIVE

/ Infinitely variable main drive / Powerful asynchronous AC motor / Main spindle bearing: Lifetime lubricated

MACHINE BASE

/ Stable construction

CONTROL

- / Latest digital AC control technology / 21,5" Touchscreen / MOC: Integrated PC / WinNC: All standard NC controls on one machine / Multifunction wheel
- MACHINE DESIGN
 - / Stable, gray cast-iron construction / Profile rails in X / Y / Z with automatic central oil lubrication

PRODUCTIVE TRAINING AT INDUSTRY LEVEL

Equipped with a programmable, hydraulic tailstock and in combination with C-axis, driven tools and digital drive technology, the Concept TURN 460 corresponds in function and performance to a modern industrial machine. With its WinNC control system, it is also perfectly adapted to the requirements of the training situation.

Geared wheel (Stainless steel)

TOOL TURRET

/ 12 stations VDI 30 axial / Six stations driven upon request / Milling of polygons / Synchronized thread cutting

WORK AREA

/ Unobstructed chip fall / Best possible ergonomics / Completely covered guideways

MACHINE COVERS

/ Comprehensive protection against flying chips/ 100 % cooling medium tight / Optimal vision in the work area / Large safety glass window in door

SPINDLE

/ High drive power / Thermo-stable assembly / Large rotational speed range
/ Spindle connection A2-5 / Maximum bar Ø 45 mm

CONTROL UNIT

- / Up-to-date digital AC controlling technology / 21.5" Touchscreen
- / MOC: integrated PC
- / WinNC concept: all standard
- NC controls on one machine
- / Multifunctional handwheel

TRAY 6 / PC keyboard with PC mouse

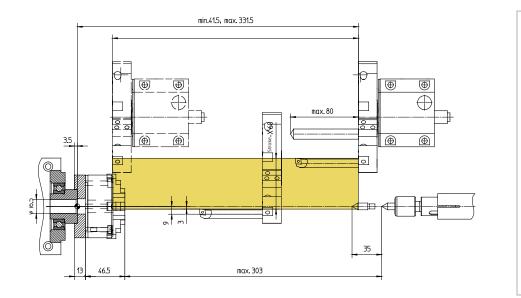

MACHINE BASE

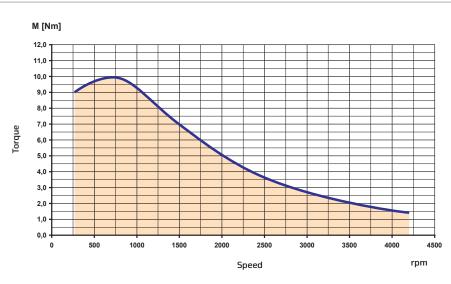

/ Easy to transport / Large cooling tank / Easy to clean

/ Hydraulically actuated, programmable tailstock

WORK AREA AND TORQUE CONCEPT TURN 60

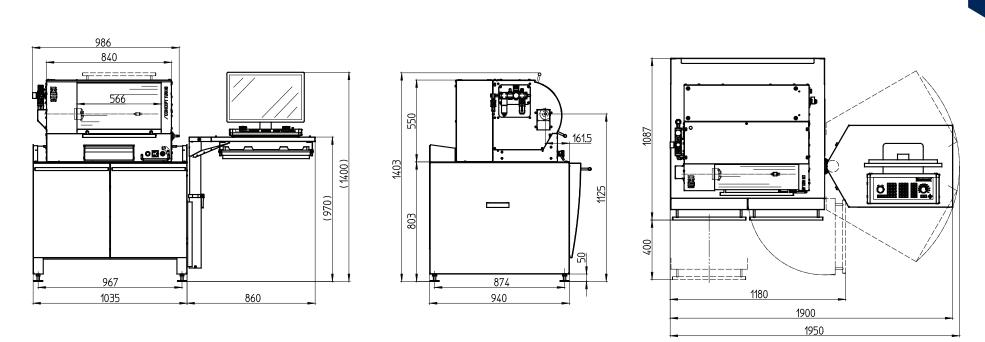

HIGHLIGHTS

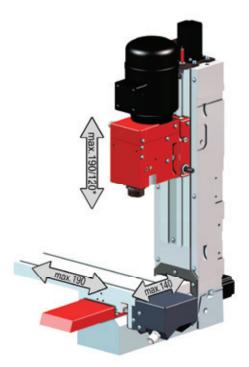

- / Industry-standard inclined-bed design
- / High-resolution axis motors
- / Clockwise/counterclockwise spindle rotation
- / Infinitely adjustable main drive
- / Automatic 8-position tool turret: above the center of rotation for improved chip removal and optimal reachability of the workpiece by the operator
- / Automatic referencing
- / Profile rail guides (linear guides)
- / Premium industrial Components
- / Safety technology according to the latest lathes standard
- / Made in the Heart of Europe

- / Mechanical tailstock
- / Robotic- and DNC-Interface (for integration in FMS and CIM)
- / Automatic clamping devices
- / Automatic door and electromechanical tailstock
- / Electronic handwheel
- / Minimal quantity lubrication
- / Machine base with swivel table
- / Easy2operate

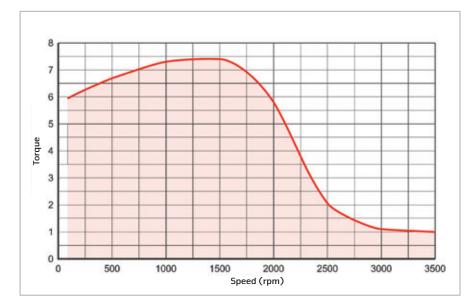

WORK AREA AND TORQUE CONCEPT MILL 55

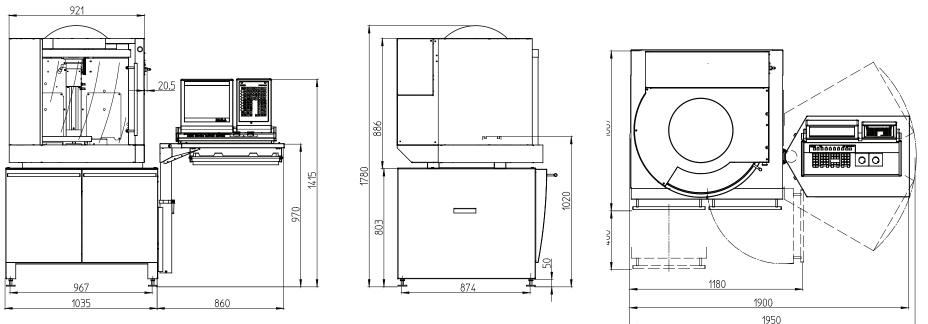

HIGHLIGHTS

- / Stable, gray cast iron construction
- / Clockwise/counterclockwise spindle rotation
- / Infinitely variable main drive
- / Automatic reference points
- / Fully covered work area
- / Made in the Heart of Europe

OPTIONS

/ 8-station tool changer / Minimum quantity lubrication / Electronic handwheel / Engraving spindle attachment / NC indexing attachment as optional fourth axis / Robotic- and DNC-Interface (for integration in FMS and CIM) / Machine base with swivel table / Easy2operate

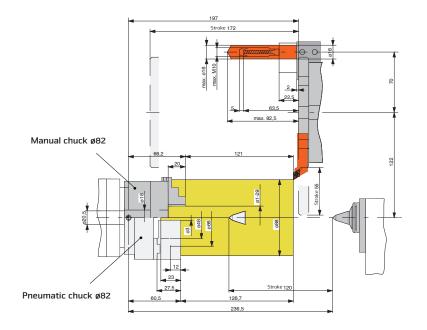

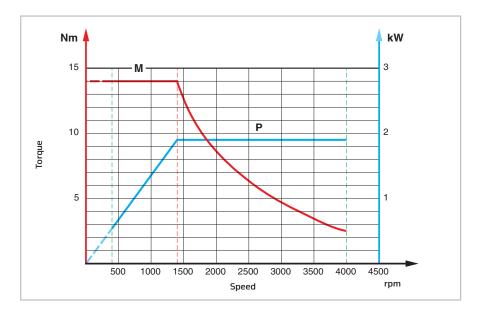

<u>5</u>2

CONCEPT MILL

WORK AREA AND TORQUE CONCEPT TURN 105

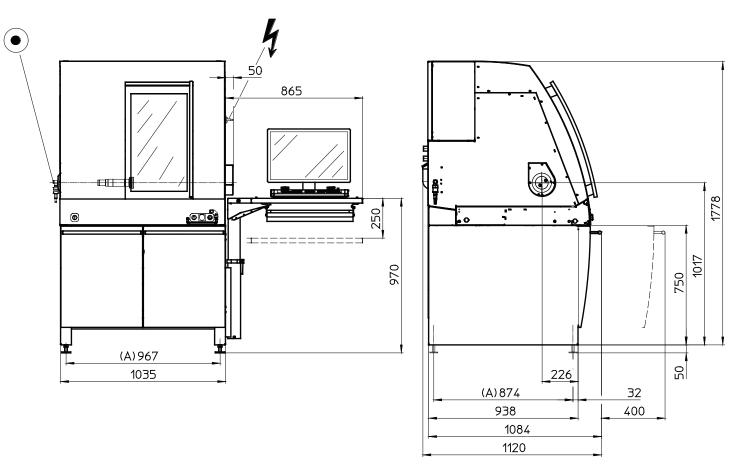

HIGHLIGHTS

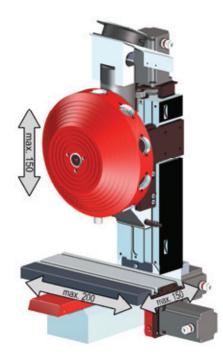

- / Stable, gray cast-iron inclined-bed construction
- / Three-point support for machine bed
- / Hardened guideways
- / Central lubrication system
- / 8-station tool changer
- / Fully enclosed work area
- / Made in the Heart of Europe

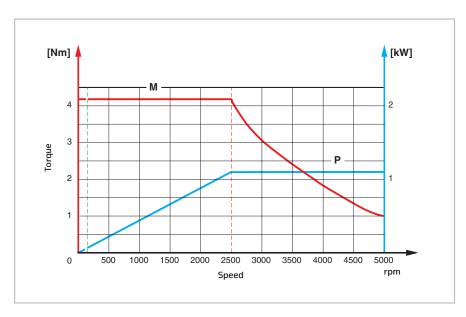

- / Extensive tool range
- / Pneumatic tailstock
- / Easy20perate
- / Robotic- and DNC-Interface (for integration in FMS and CIM)
- / Automatic clamping device
- / Minimum quantity lubrication
- / Coolant system
- / Machine base with swivel table

WORK AREA AND TORQUE CONCEPT MILL 105

HIGHLIGHTS

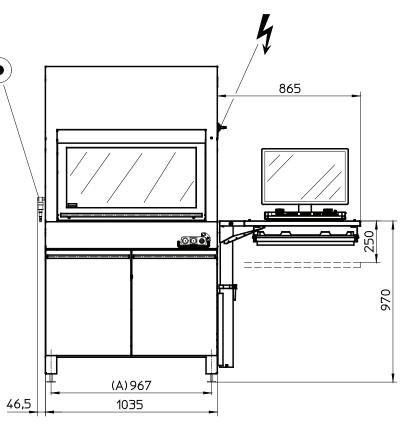

- / Stable, gray cast-iron construction, suitable for industrial use
- / 10 station tool changer with directional logic
- / Backlash-free bearings for working spindle in precision, lifetime-lubricated, angular ball bearings
- / Infinitely variable main and feed drives
- / Realistic execution of all essential milling operations
- / Made in the Heart of Europe

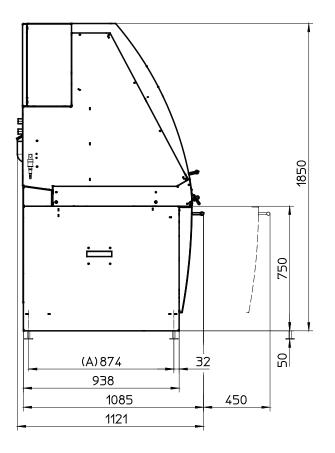

OPTIONS

- / NC indexing device (fully functioning fourth axis) with tailstock, three-jaw chuck and live center
- / Engraving spindle attachment
- / Robotic- and DNC-Interface (for integration in FMS and CIM)
- / Automatic clamping device
- / Electronic handwheel
- / Coolant system
- / Minimum quantity lubrication
- / Machine base with swivel table
- / Easy2operate

MACHINE LAYOUT

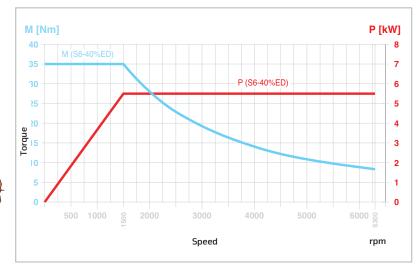

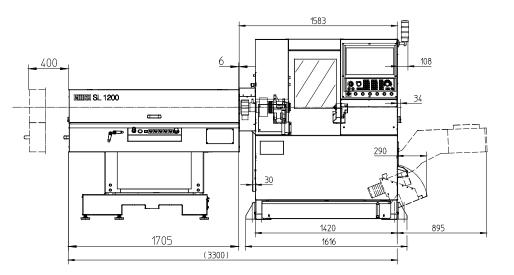

WORK AREA AND TORQUE CONCEPT TURN 260

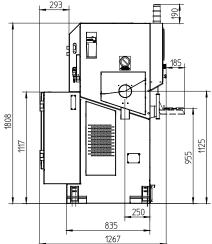

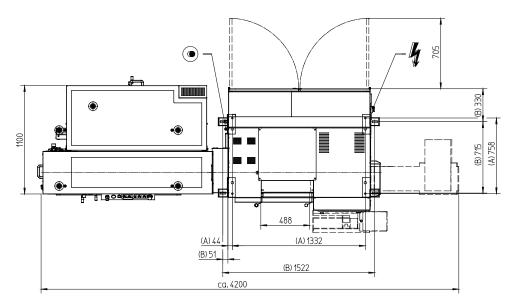

HIGHLIGHTS

- / PC-controlled CNC turning machine
- / Extremely solid machine base, top thermostability
- / Highest precision
- / Compact construction
- / USB and ethernet interface integrated
- / Servo-motor technology in all axes
- / New drive generation from Siemens
- / Siemens Safety Integrated
- / Absolute encoder (no referencing necessary)
- / Field bus system integrated with profinet
- / Made in the Heart of Europe

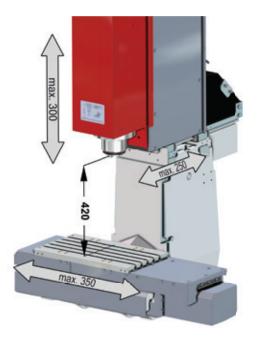

- / Chip conveyor
- / 3-jaw chuck Ø 95 mm (3.7")
- / Collet chuck 385 E
- / Automatic door
- / Robotic- and DNC-Interface (for integration in FMS and CIM)
- / Attractive tool packages for the TC and TCM versions
- / Coolant equipment
- / Bar loader

MACHINE LAYOUT

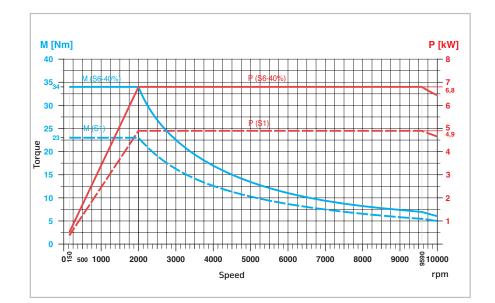

WORK AREA AND TORQUE CONCEPT MILL 260

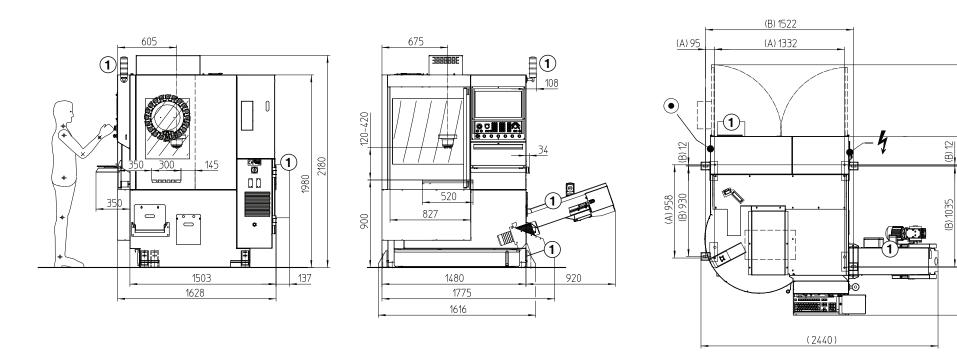

HIGHLIGHTS

- / High drive speed
- / 20-tool magazine
- / Tool taper SK30 according DIN 69871
- / Stable and compact machine construction
- / Best view when fully enclosed
- / Servo motor technology in all axes
- / USB and Ethernet interface integrated
- / Made in the Heart of Europe

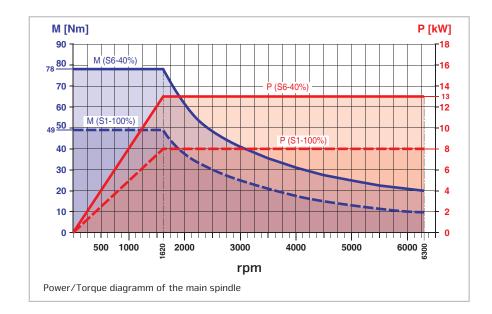

- / Turning-tilting table (4th/5th axis)
- / Large number of automation possibilities
- / Chip conveyor
- / Coolant system
- / Automatic door
- / Robotic- and DNC-Interface (for integration in FMS and CIM)

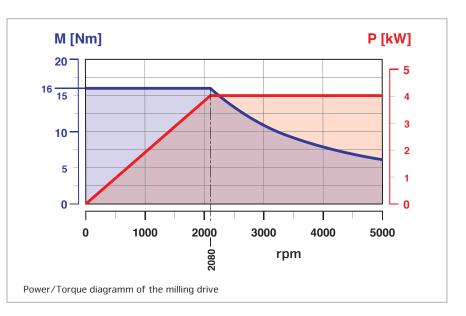

WORK AREA AND TORQUE CONCEPT TURN 460

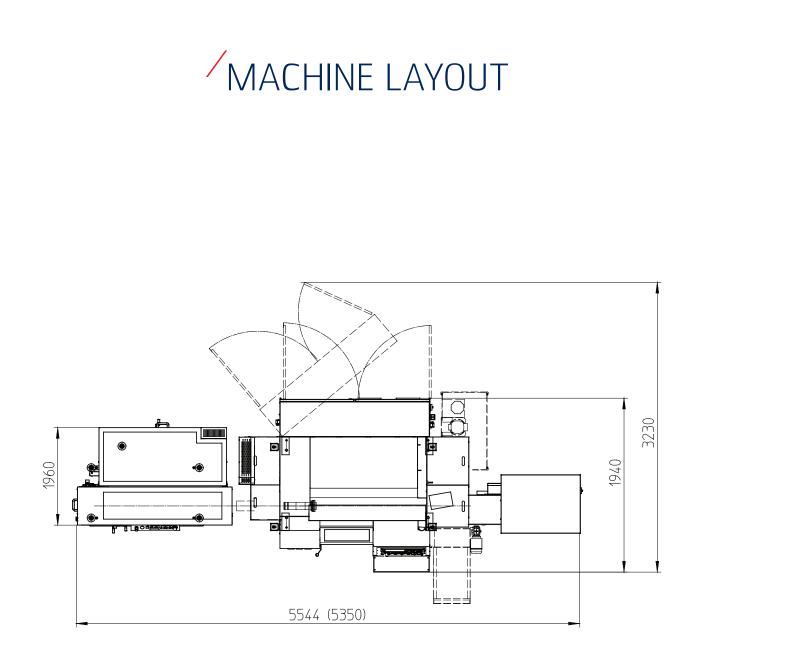

HIGHLIGHTS

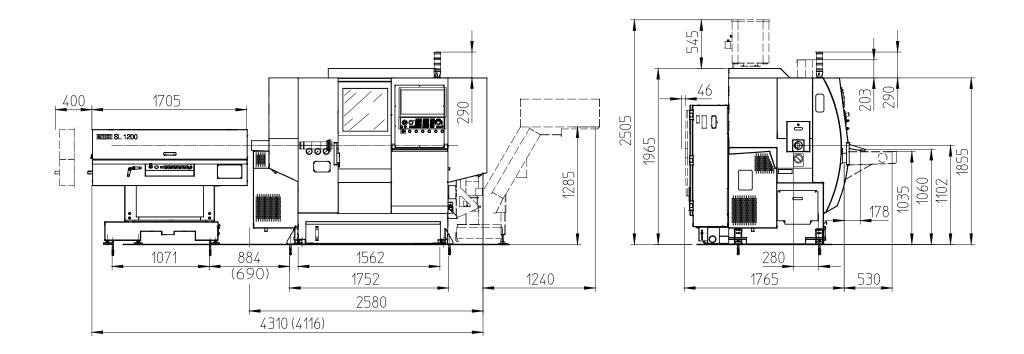

- / Universal applications
- / Digital drive engineering
- / Hydraulically actuated, programmable tailstock
- / Extraordinary dynamics
- / Optimal thermostability
- / High processing accuracy
- / Compact machine assembly
- / Made in the Heart of Europe

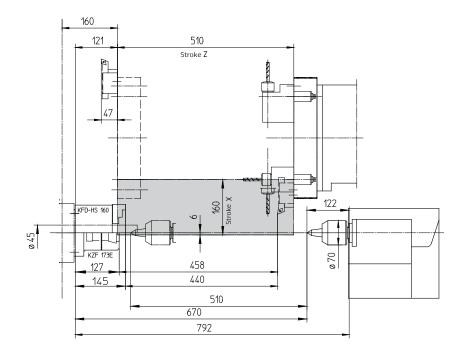

- / Chip conveyor
- / 3 jaw chuck 170 mm
- / Collet chuck 173 E
- / Automatic door
- / Robotic- and DNC-Interface (for integration in FMS and CIM)
- / Attractive tool package
- / Part collecting device
- / Driven tools
- / Bar loader

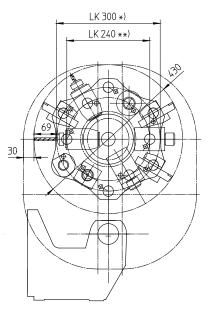

MACHINE LAYOUT CONCEPT TURN 460

without driven tools - version TC with driven tools - version TCM

The concept of an exchangeable control unit that works with all Concept machines is unique. A single machine is all it takes to train the user in the handling of all industrial CNC controls commonly available on the market. The result: CNC technicians who can be flexibly deployed, which is a decisive advantage for both the company and its skilled workers.

Machines

/ Concept machines / Conventional turning and milling machines / Industrial machines

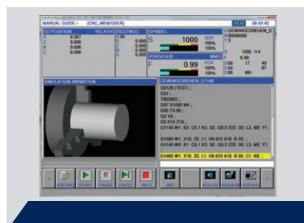

respective software.

- / Possibility to train the use of several control units on one machine
- / New controls can easily be installed on the machine by means of a software upgrade. It is not necessary to switch machines or take any retrofitting measures.
- machine software
- / Straightforward networking and free-of-charge remote access thanks to the use of standard Windows apps
- / Attractive homeschooling licenses for distance learning

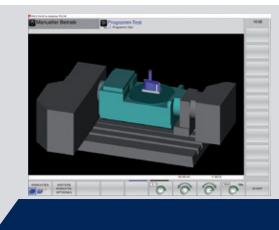

TRAINING **INDUSTRIAL**

THE INTERCHANGEABLE CONTROL WINNC

The change to a different control system is carried out within a minute by calling up the

WinNC for Fanuc 31i including Manual Guide i

Simulation suitable for training using Win3D View

Better control through simulation with Win3D-View

Easy20perate

- / Clearly arranged control elements, as is the case with industrial machines
- (electronic handwheel, speed override etc.)
- / Separate feed override controller with zero dead stop / Multifunctional controller with selectable functions

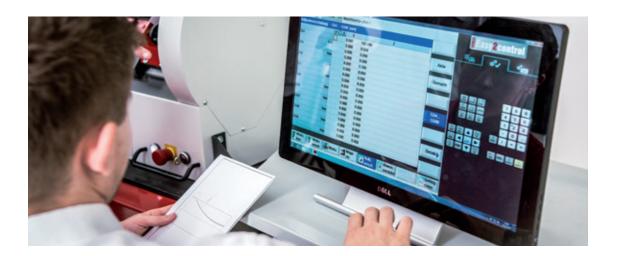

CAMConcept

- / 3D machining simulation
- / Text milling
- / Editable tool library
- / Context-dependant help
- / Direct activation of the Concept 55/60/105 series
- / Export by post-processors (available as an option)
- / DXF interface
- / Network capability
- / Download of a free 30-day demo version from EMCO's website www.emco-world.com

Easy2Control

Easy2Control is a virtual on-screen keyboard suitable for mouse or touchscreen operation.

- / On-screen illustration of the control and machine keyboards virtual machine control panel
- / Different control panels for machine, control and quick accesses switchable via tabs
- / Wide range of keyboard and configuration possibilities
- / Allows for realistic training at programming stations

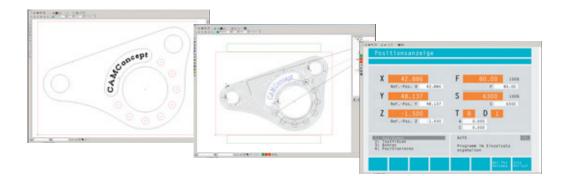

Easy20perate is a hardware operator panel for machines of the Concept 55/60/105 series and programming stations.

/ Including Easy2Control

CAMConcept is an innovative software for full CAD/CAM and CNC training – from construction to production. All core functions of CAD programs are available. Clear CNC cycle graphics enable quick programming, whereas simulations and collision checks ensure safe programming control. Straightforward and low-threshold operating procedures ensure quick learning successes. CAMConcept consists of a CAD part, a CAM part and a CNC part.

CONCEPT MILL

/OVERVIEW INDUSTRIAL TRAINING SOFTWARE

WinNC

- / Interchangeable control for Concept machines and PC workstations
- / Various controls that are common on the market can be used and trained on one single machine
- / Reduced investment costs
- / Sustainable investment due to possibility of control upgrade on the machine
- / Simple and affordable networking and remote access
- / Easy change of various controls and key modules within 1 minute

Win3D-View (Option to WinNc)

- / Sectional view
 / Collision detection
 / A useful training tool
 / Tool and workpiece display
- / Library of tools
- / Displays work processes

Easy2Control (Option to WinNC on programming stations)

- / Virtual control panel
- / Operation with touch screen or PC mouse
- / Quick and easy configuration
- / Look-and-feel of the industrial control

Easy20perate (Hardware option for the 55/60/105 machines and programming stations)

- / Clear arrangement of controls as on an industrial machine
- / Separate feed-override controller with zero stop
- / Multifunctional controller with selectable functions (electronic handwheel, speed override, etc.)
- / Easy2Control integrated

CamConcept

- / CAD part, CAM part, CNC part and work preparation from a single source
- / Symbol-controlled operator guidance, simple operation for training
- / 3D simulation of machining and text milling included
- / Direct control of the Concept series 55/60/105
- / Export by means of post-processors (option)

License versions

The exchangeable control WinNC, Win3DView, Easy2Control and CAMConcept are available in different license versions.

Machine license

One license of the corresponding software is required per machine for operation

Single license programming station

For the installation of the corresponding software on one workstation.

Multiple license programming station

Cost-effective solution for institutes and training workshops. Allows unlimited number of installations within the site.

Homeschooling license

Extension of the multiple license - allows the installation for any number of homeschooling participants even outside the institute's location with a practical term of 5 years.
