ARE YOU CONSIDERING BUYING A MACHINE?

DISCOVER 6 KEY TECHNICAL ASPECTS

Choosing a CNC lathe is not just a question of price. Several technical factors determine the performance and useful life of the machine: the type of bench, the prismatic guides, the power of the driven tool... In this guide we share 6 key aspects that you mustn't overlook before you decide.

SOLUTIONS TO YOUR NEEDS

SINGLE TURRET LATHES

Lathes from CMZ's TA and TD series complete CMZ's single turret range with powerful, accurate and highly configurable machines. Their integrated oil-cooled turret reaches a maximum speed of 12,000 rpm in continuous (S1) operation.

READ MORE

MULTI-TURRET LATHES

The TTS and TTL series make up our range of multi-turret lathes. These beltless models, equipped with oil-cooled integrated motors, are perfectly suited for machining complex components. Their X3 and Z3 axis movements enable unique capabilities such as the optional integration of a tailstock, simultaneous operation with three tools, and the ability to machine longer workpieces.

OVER A DECADE COMMITTED

TO YOUNG TALENT

With the entry into force of new legislation on vocational training in Spain, this May the newspaper El Correo published an interview with our colleague Mónica López, head of recruiting at CMZ. In the interview, she talks about the key role of young talent and vocational training in the group's growth strategy.
